Facilities Applying for IAC Accreditation in Low Dose CT (LDCT) Lung Cancer Screening:

All facilities applying for accreditation in Low Dose CT (LDCT) lung cancer screening must apply for accreditation or currently be accredited in the testing area of Body CT.

Facilities that are not yet accredited by the IAC:

- Submit the application selecting the testing area of Body CT and LDCT lung cancer screening as well as any other testing areas for which the facility performs CT examinations (e.g., Neurological CT, Vascular CTA).
- The facility-specific policy that confirms that the facility meets all the CMS requirements must be submitted (refer to sample policy at intersocietal.org/ct/main/lungscreening.htm or refer to IAC Standards and Guidelines for CT Accreditation for guidance).
- A total of six case studies for each CT unit are required to be submitted regardless of the number of selected testing areas (e.g., Body CT, Neurological CT). At least one LDCT lung cancer screening case study must be submitted in the testing area of Body CT.
- The IAC CT application fee for the first CT unit is $2,600. Refer to intersocietal.org/ct/seeking/fees.htm for additional fee information.

Facilities that are currently accredited by the IAC, BUT NOT ACCREDITED in the testing area of Body CT:

- Add the testing area of Body CT to include LDCT lung cancer screening. Please visit intersocietal.org/ct/accredits/adding_testing_area.htm and select “adding a testing area” for specific information and documentation to be submitted.
- Three LDCT lung cancer screening case studies must be submitted.
- The facility-specific policy that confirms that the facility meets all the CMS requirements must be submitted (refer to sample policy at intersocietal.org/ct/main/lungscreening.htm or refer to the IAC Standards and Guidelines for CT Accreditation for guidance).
- A $400 fee for the add on testing area will be assessed.

Facilities that are currently accredited by the IAC, AND ARE CURRENTLY ACCREDITED in the testing area of Body CT:

- Please visit intersocietal.org/ct/accredits/adding_testing_area.htm and select “adding a testing area” for specific information and documentation to be submitted to add on LDCT Lung Cancer Screening.
- Three LDCT lung cancer screening case studies must be submitted.
- The facility-specific policy that confirms that the facility meets all the CMS requirements must be submitted (refer to sample policy at intersocietal.org/ct/main/lungscreening.htm or refer to the IAC Standards and Guidelines for CT Accreditation for guidance).
- A $400 fee for the add on testing area will be assessed.
