IAC CT RELEASES UPDATES TO STANDARDS

SEPTEMBER 15, 2014 | As an accreditation organization, IAC CT is committed to maintaining a program that balances the changing needs of both the CT community and the general public by influencing the quality of patient care provided. The IAC Standards and Guidelines for CT Accreditation are the most important component of that commitment. Composed by physicians, physicists and technologists from the IAC sponsoring organizations, the Standards are reviewed periodically by the Board of Directors and revised as needed.

As a component of the accreditation process, once approved by the IAC CT Board of Directors, proposed Standards are posted to the IAC CT website for a 60-day public comment period. Standards that are affected by the most recent public comment period (April 15, 2014 to June 15, 2014) are included in this published version.

ACCESS THE STANDARDS

View the new IAC Standards and Guidelines for CT Accreditation on the IAC CT website.

KEY REVISIONS TO THE IAC STANDARDS FOR CT

Modifications are shown in the current Standards in highlighting and include:

• Personnel and Supervision - Technical Staff Required Training and Experience (Applicable Standards: 1.4.1.6A and 1.4.1.7A)

Standards that are highlighted become effective September 15, 2014. Applications submitted after September 15, 2014 must be in compliance with the new Standards.
