

Proposed Changes to IAC Nuclear/PET Standards Now Open for Public Comment

COMMENT PERIOD NOW CLOSED

APRIL 1, 2016 | In keeping with the IAC's continued commitment to streamlining and simplifying the accreditation process, we are pleased to announce that the public now has the opportunity to comment on proposed changes to the [IAC Standards and Guidelines for Nuclear/PET Accreditation](#).

A substantial change to the IAC Nuclear/PET *Standards* regarding the required radiopharmaceutical activities and their corresponding radiation effective doses is proposed. To read background on this change, please visit intersocietal.org/nuclear/main/dose.htm.

The *Standards* are reviewed periodically by the IAC Nuclear/PET Board of Directors and revised as needed. As a component to the accreditation process, proposed *Standards* that have been approved by the Board of Directors are then posted to the IAC website for a 60-day public comment period. These proposed *Standards* include changes to the current *Standards*, the removal of current *Standards* and/or the addition of new *Standards*.

Beginning April 1st, 2016, the public may visit the IAC website at intersocietal.org/iac/comment_period.htm to comment on any of the proposed *Standards* until June 1st, 2016. In order to provide comments, the IAC Comment Form must be completed and submitted electronically by the provided deadline.

To Submit a Comment on Proposed Standards:

1. Visit the IAC website at intersocietal.org/iac/comment_period.htm;
2. Select the proposed Nuclear/PET *Standard* on which to comment;
3. A window will expand with the description of the *Standard* and the proposed change on the left;
4. On the right, fill in your name and comment in the boxes provided;
5. Hit **Submit**.

At the close of the comment period, the IAC Nuclear/PET Board of Directors will review any submitted comments, consider modifications as needed and vote for final approval of the *Standards*. Facilities are notified of changes to the published *Standards*, and the most current version of the *Standards* can be viewed or printed from the IAC Nuclear/PET website at intersocietal.org/nuclear/seeking/nuclear_standards.htm.
