

IAC Releases Upgrade to Online Accreditation Application

SUBMIT YOUR CURRENT APPLICATION BY APRIL 2, 2012 TO AVOID LOSING DATA

MARCH 2012 | As first announced in December, IAC Vascular Testing has released an upgrade to the Online Accreditation application.

If you have an application currently in progress, using the previous format, please be advised that you must complete and hit submit on the application currently in progress, by April 2, 2012, to not lose the data you have already entered. After April 2, 2012, your application will be defaulted to the new version and re-entering previous data will be required. The new version of the application integrates many enhancements including streamlined application questions, a more user-friendly format and a decrease in case study requirements.

If you have questions about this information or the new version of the IAC Vascular Testing Online Accreditation application, please contact the IAC Vascular Testing staff for assistance. To easily access your facility's existing Online Accreditation account via the IAC Vascular Testing website, please visit www.iaconlineaccreditation.org and enter your user ID and password.
