IAC VEIN CENTER RELEASES UPDATES TO STANDARDS

FEBRUARY 2015 | As an accreditation organization, IAC Vein Center is committed to maintaining a program that balances the changing needs of both the vein center community and the general public by influencing the quality of patient care provided. The IAC Standards for Vein Center Accreditation are the most important component of that commitment. Composed by physicians, nurses and technologists from the IAC sponsoring organizations, the Standards are reviewed periodically by the Board of Directors and revised as needed.

As a component of the accreditation process, once approved by the IAC Vein Center Board of Directors, proposed Standards are posted to the IAC Vein Center website for a 60-day public comment period. Standards that are affected by the most recent public comment period (November 3, 2014 to January 3, 2015) are included in this published version.

Modifications are shown in the current Standards in highlighting and include:

• Procedure Overview (Applicable Standard 1.1.1B Comment)

Standards that are highlighted become effective July 1, 2015. Applications submitted after July 1, 2015 must be in compliance with the new Standards.

View the new IAC Standards for Vein Center Accreditation on the IAC Vein Center website.
